

International Professional Engineers (IntPE (UK))

Applicant Guidance Notes

Before completing and submitting your application to be placed on the UK Section of the International Professional Engineers (IntPE(UK)) Register, you should read the following guidance notes, as these will enable you to complete the application form correctly.

General Information

1. The criteria for admission to the UK Section of the IntPE Register are as follows; the applicant must:
 - be registered as a Chartered Engineer (CEng) with the Engineering Council
 - have an academic qualification equivalent to an accredited degree
 - have seven years post-graduation experience
 - have two years in responsible charge of engineering work
 - be maintaining continuing professional development
2. If, at any time, whilst registered on the IntPE Register, the registrant's membership of their Institution lapses, the registrant will be suspended from the IntPE Register. Should the lapsed Institution membership and professional registration be resumed, the Engineering Council will re-instate IntPE registration, on receipt of confirmation from the Institution that a satisfactory CPD record has been provided.
3. The experience required of an application **must** be post-graduation. Even if the applicant has significant experience in the engineering field and has undertaken and successfully completed an accredited degree (or equivalent academic qualification) as a mature student, the only experience that can be considered is post-graduation.

Education

4. Applicants should note that the following meanings apply to the definition of 'graduation':
 - Accredited degrees – the date the degree is awarded
 - Non-accredited degrees – the date the degree is awarded, unless a top-up is required
 - Top-up requirement (Further Learning) – the date the last requirement is completed/awarded
 - Engineering Council Examination – the date the last examination is passed, that satisfies the educational requirement for CEng.
5. The Engineering Council is unable to accept applications from Chartered Engineers who have gained their status through the Mature Candidate Route (MCR), Career Appraisal Route, the Senior Route, and the Technical Report option (even where there is an

underlying academic qualification) under the Individual Route since the introduction of UK-SPEC). It is unlikely that this situation will change in the near future.

6. The degree course title provided should be that detailed on the degree certificate. If this is not correctly provided, the application could be delayed whilst the correct information is obtained. The name of the university (or other Higher Education Institution) at which the degree was gained should be that on the graduation certificate, even if its name has subsequently changed.

Engineering Experience Report

7. A brief record of post-graduation engineering experience is required, with all periods of employment detailed clearly. It is in the interest of the applicant to provide sufficient information from which a decision can be made at the IntPE Register committee meeting. **In particular the period of at least two years in responsible charge of significant engineering work should be clearly described.** *The level of responsibility should be demonstrated, in part, through the inclusion of an employer's organisation chart clearly indicating the position of the applicant in the employer's management structure.* The applicant should avoid using abbreviations as this may cause confusion and result in the need for further information to be provided by the applicant.

Continuing Professional Development (CPD)

8. An up to date record of the applicant's CPD is required to demonstrate that relevant CPD is being maintained. **The CPD record should cover the last 24 months** and provide sufficient detail, particularly where self-learning is involved. CPD should be relevant to the engineering work the applicant is involved in. Details of the benefits gained from the CPD should be included in the report.

For guidance on CPD the applicant should contact the licensed professional engineering institution of which they are a member.

9. The IEA guidelines state that:
*"By undertaking a coherent programme of CPD across his or her field of engineering practice of about **50 hours** of committed time **per year** a person would normally be able to maintain the currency of his or her knowledge and skills in the relevant field."*

The assessing committee will therefore be looking for evidence of 50 hours of CPD per year in an application.

Fees

10. The £105 application fee should be made payable to the licensed professional engineering institution through which the applicant is applying for registration. The Institution will forward this fee, minus an administration fee of £30, to Engineering Council with the completed application form, signed by a member of staff as being acceptable under the requirements of the IntPE Register.

11. IntPE (UK) registration is granted for five years, at which point registration may be renewed through revalidation of CPD and payment of a renewal fee, which is currently £60. In the event that relevant and appropriate CPD is not maintained, the registrant may be removed from the IntPE Register. If your Institution requires annual CPD returns, you should provide copies of these with your application.
12. If, in the event that the Institution through which the applicant is applying determines that the application is not acceptable, the applicant will be contacted directly by the Institution for supplementary information or requesting that the application is resubmitted, possibly at a later date.

Successful Applicants

13. Successful applicants will be issued a certificate of registration and will be entitled to use the post-nominal designation, IntPE (UK).
14. The applicant is responsible for ensuring that all changes of details are provided to the Engineering Council to enable the UK Section of the IntPE Register to be current and accurate.

Unsuccessful Applicants

15. Unsuccessful applicants will be informed in writing of the reasons for the failure of their application.
16. If the application is deferred, an opportunity to re-submit for re-consideration at the next panel meeting will be given. An application can be deferred on up to two occasions and have a 6 month period to re-submit following the notification of deferral. If a re-submission has not been received within a 6 month period the application will be withdrawn.
17. If upon the third re-submission the applicant has still not demonstrated their suitability the application will be rejected.
18. If an application is rejected the applicant will be informed in writing of the reasons for the failure of their application, and granted the right of appeal. Details of the appeals procedure will be provided at that time. The application fee is non-refundable.
